ABOUT ME

I am a third-year Computer Science student with a strong passion for software development. I have experience in programming languages such as Java, Python, HTML, CSS, JavaScript, and PHP. I am eager to apply my academic knowledge and technical skills through internships and collaborative projects, contributing innovative solutions to the tech industry.

PROJECTS

Library Management System   2022

The project is a software for managing books in the library. The software is developed using Java and is completed as the final requirement for the Advanced Object-Oriented Programming subject.

Auto Repair Shop Management System   2023

This project involves a web-based software designed to showcase the first-come first-serve scheduling algorithm in an auto repair shop. It is created for the subject of Operating Systems.

Enrollment Management System   2023

This project is a web-based system created to streamline the enrollment process at Burol Elementary School. It fulfills the final requirements for our Software Engineering course, in collaboration with other subjects.
